## Profile Summary

---

Computer Engineering graduate and Full Stack .NET Developer building full-stack web applications with C#, ASP.NET Core (MVC & Web API), Entity Framework Core, and SQL Server. Hands-on project experience with layered (N-Tier) architecture, the Repository & Unit of Work patterns, SOLID principles, and RESTful API design. Skilled in JWT-based authentication, role-based authorization, and writing clean, maintainable code. Comfortable working within Agile/Scrum teams, with a strong drive to learn new technologies.

## Technical Skills

---

**Languages:** C#, SQL, JavaScript, HTML, CSS, C++

**Backend & Frameworks:** ASP.NET Core MVC, ASP.NET Core Web API, ASP.NET Core Identity, Entity Framework Core, LINQ, ADO.NET, Windows Forms, Middleware

**Architecture & Design Patterns:** OOP, SOLID, Clean Code, N-Tier Architecture, Repository Pattern, Unit of Work, Dependency Injection

**API & Security:** RESTful API, JWT Authentication, Refresh Token, Role/Policy-Based Authorization, Swagger/OpenAPI

**Database & Tools:** Microsoft SQL Server, T-SQL, Database Design, Git, GitHub, AutoMapper, FluentValidation

**Frontend:** HTML, CSS, JavaScript, Bootstrap

**Methodology:** Agile (Scrum), Code Review, Technical Documentation

## Experience

---

### Project Engineer Intern — Erkasis Mühendislik 01/2026 – 06/2026 (6 months)

- Supported the development of C# / SQL Server-based software solutions for technical data management and automation in industrial project processes.
- Contributed to technical data management, analysis, and team coordination efforts across project workflows.

### Full Stack Developer Intern — DivideSoft 04/2024 – 11/2024 (8 months)

- Took part in developing full-stack web applications using ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, and SQL Server.
- Built modular web applications for client requirements; designed RESTful APIs to ensure frontend-backend integration and ran API tests with Swagger.
- Optimized database CRUD operations using the Repository & Unit of Work patterns, reducing code duplication by 40%.
- Worked within an 8-person software team following Agile (Scrum) practices; managed version control with Git/GitHub.

### Full Stack .NET Developer — Freelance / Portfolio Projects 11/2024 – 01/2026 (14 months)

- Designed and developed 4 comprehensive end-to-end portfolio projects based on N-Tier architecture principles, prioritizing security, maintainability, and code quality in each.
- Built RESTful APIs (Student API) with secure session management via JWT Authentication and Refresh Token mechanisms and Role-Based Authorization; produced enterprise-standard technical documentation with Swagger/OpenAPI.

- Abstracted the data access layer by applying the Repository and Unit of Work design patterns, resulting in a scalable, testable, and maintainable software architecture.

## Projects

---

### **AdvertisementApp — Full Stack Listing Management System** | [GitHub](#)

A web application built with N-Tier architecture that lets users post and manage listings. Membership system implemented with ASP.NET Core Identity; authorization applied for Admin/User roles.

**Technologies:** ASP.NET Core MVC, N-Tier Architecture, C#, Entity Framework Core, SQL Server, Repository Pattern, Unit of Work, AutoMapper, FluentValidation, Bootstrap, JavaScript

### **Student API — Secure RESTful Web API** | [GitHub](#)

A student management service built with N-Tier architecture. Secure API access provided through JWT Authentication, Refresh Token, and Role-Based Authorization.

**Technologies:** C#, ASP.NET Core Web API, JWT Authentication, Refresh Token, Swagger/OpenAPI, REST API, Authorization

### **Digital Vehicle & Driver Licensing System** | [GitHub](#)

A layered desktop application built with WinForms that manages vehicle registration and driver licensing processes. Database operations optimized with ADO.NET; auditability provided through Windows Registry and Event Log integration.

**Technologies:** .NET Framework (C#), Windows Forms, SQL Server, T-SQL, ADO.NET, Three-Tier Architecture, Windows Registry, Windows Event Log

### **Web Design Projects**

**Corporate Website Template** | [GitHub](#) | [Live Demo](#)

**Kasper Web Template** | [GitHub](#) | [Live Demo](#)

**Portfolio Website Template** | [GitHub](#) | [Live Demo](#)

## Education

---

### **Namık Kemal University — Computer Engineering (B.Sc.)** *September 2022 – June 2026*

GPA: 2.94/4.00 | Additional Training: 32 software development courses completed through ProgrammingAdvices and various other platforms

## Languages

---

Turkish: Advanced | Arabic: Advanced | English: Beginner
